

Water Environmental Planner/Project Manager

Summary

- Seeking an environmental planner with experience planning for water resources, water infrastructure, and ecological restoration
- Individual will support National Environmental Policy Act (NEPA) compliance, state-level equivalent reviews, and environmental permitting
- Requirements include BS/BA degree in the field of environmental science, environmental policy, planning, economics, or an equivalent discipline and at least 5 years of relevant experience

About EMPSi

Do you want to help solve the most pressing challenges facing western water and the communities and ecosystems that depend on it? How can the Colorado River be managed to meet water demands and protect environmental resources in a drier and hotter future? What is the best way to restore the Rio Grande to its natural flow regime while increasing resiliency in the face of climate change? How can salmon be successfully reintroduced in the Columbia River to restore native fish populations and traditional tribal food sources? These are all questions that **Environmental Management and Planning Solutions, Inc. (EMPSi)** is working with our clients to answer. Together with our team of planners, scientists, economists, and lawyers, you will have opportunities to collaborate and gain experience on a wide variety of exciting and challenging projects in river basins across the United States.

EMPSi is a national environmental consulting firm providing a variety of environmental compliance, permitting, and planning services to government agencies, land managers, and private clients. We excel with complex projects, including land use planning for public lands and waters, ecological restoration, and renewable energy and infrastructure development. We invest in our employees through competitive salaries, benefits (medical, dental, vision, retirement, and others), and incentive programs designed to further the professional development of each employee in line with the firm's business goals and needs. The Opportunity

To support our growing repertoire of projects, we are seeking a motivated, organized, and self-sufficient professional Environmental Planner to be based in one of the following locations: **Reno, NV; Portland, OR; Boulder, CO; Salt Lake City, UT; Boise, ID; or Santa Fe/Albuquerque, NM**. This professional will join our interdisciplinary team to support National Environmental Policy Act (NEPA) compliance, state-level equivalent reviews, and environmental permitting by leading technical assessments of impacts on the social, natural, and

physical environment; interfacing with clients and other technical experts; coordinating public outreach efforts; and contributing to a positive teamwork-oriented company culture. EMPSi is especially interested in candidates with experience planning for **water resources, water infrastructure, and ecological restoration**. This is largely an office-based role, though travel to project areas around the west and across the United States may be required depending on client and/or project needs.

The ideal candidate will demonstrate experience in contributing to and leading complex environmental studies for water and natural resource planning and environmental management. This position requires excellent communication, technical, and writing skills; attention to detail; and the ability to lead an interdisciplinary team. Opportunities for growth include development of client relationships, marketing and business development, and managing interdisciplinary teams on diverse and increasingly complex projects. EMPSi invites qualified applicants with a bachelor's degree or higher in the field of environmental science, environmental policy, planning, or an equivalent discipline with at least 5 years' direct work experience to apply for the position. Master's degree is a plus.

Required qualifications:

- BS/BA degree in the field of environmental science, environmental policy, planning, economics, or an equivalent discipline
- At least 5 years of relevant experience with environmental impact assessment or water resources planning
- Excellent communication, technical, and writing skills
- Passion for quality work products and attention to detail
- Knowledge of federal environmental laws and their implementing regulations, including, but not limited to: National Environmental Policy Act, Clean Water Act, Clean Air Act, Endangered Species Act, and the National Historic Preservation Act
- Knowledge of current issues and projects related to the Bureau of Reclamation, Bureau of Land Management, Forest Service, and other federally administered lands
- Excellent organization and time-management
- Experience planning for or managing water resources or ecological restoration preferred

How to Apply

Send resume to jobs@empsi.com. Include "Water Environmental Planner/Project Manager" in the subject line.

EMPSi is an Equal Opportunity Employer. Wages for this position are dependent on experience and qualifications. The salary range for this position is between \$75,000 and \$110,000.
